

# End-to-End Asset & Risk Visibility at Global Scale

See every asset. Control every risk. Prove security at global scale.

## When Scale Hides Risk

This global enterprise wasn't breached, it was bleeding from within. With 1M+ assets across 10+ regions, the organization was buried under fragmented inventories, siloed data, and 700M+ vulnerabilities. Legacy tools couldn't keep up. No single source of truth, no risk-based prioritization, no board-ready insights.

The result? Security teams chasing shadows, executives making decisions in the dark and attackers exploiting gaps faster than defenses could react. This wasn't a just a visibility issue. It was a strategic failure, and the cost was compounding by the hour.

**Global Scale, Local Chaos**  
10+ regions,  
disconnected data

**Unmanageable Vulnerabilities**  
700M+ risks

**Tool Overlap**  
Multiple systems,  
no unified visibility

## ApexaiQ Turns Fragmentation into Clarity

Unified Risk Intelligence Platform

### Unified Visibility

Every asset, every vulnerability, across 10+ regions, instantly surfaced in one intelligent view.

### Inventory & Vulnerability Management

No more guesswork. Real-time discovery and validation closed the loop on exposure.

### Board-Grade Intelligence:

KPIs and risk scores built for enabling confident, data-driven decisions

### Operational Efficiency at Global Scale

Standardized workflows saved hundreds of hours, slashed response times, and eliminated friction.

### Accelerated Go-to-Market:

Reduced tool sprawl, simplified offerings, and unlocked new revenue streams.

## Outcome

Global Risk Intelligence, Simplified.

**ApexaiQ changed vulnerability overload into strategic control.** When legacy tools failed, it delivered unified visibility across 1M+ assets in 10+ regions, with **real-time inventory, patch validation,** and board-level **risk intelligence.** By **streamlining workflows and reducing tool sprawl,** ApexaiQ empowered leadership with the **clarity, speed, and confidence** to act decisively.

This global enterprise's story reflects changes CIOs and CISOs everywhere face:

**"ApexaiQ answers the question of 'What don't I know?' It helped us identify critical gaps in our IT inventory and proactively address risks."**

- Brad Kirlin, Fidelity Cooperative Bank

**Join enterprises achieving 99.9% visibility and measurable risk reduction.**
